Here's the
answer to your
septic system
problems

TOTAL TREATMENT
FOR SEPTIC SYSTEM

ECOCARE

If your drains seem sluggish and are starting to smell, or the toilet's slow to empty, the chances are that your septic system needs some attention. Nasty odours, clogged drains, overflowing septic tanks and blocked absorption trenches are more than just embarrassing and inconvenient though ... they can be costly to fix and, more importantly, dangerous to your family's health. When it comes to septic system problems you need them fixed fast, and you need to make sure they won't be back ... Ecocare Activator will solve your problem quickly, simply and cheaply.

The problem

Septic systems rely on the action of naturally occurring bacteria to break down waste. However, harsh chemical-based cleaners and non-biodegradable detergents can quickly kill off good bacteria and upset the balance of your septic system.

With too few bacteria, or the wrong type, your septic system's efficiency drops dramatically. Bad smells develop, waste is left unconsumed, and blockages and expensive pump-outs become more frequent. You might even have to renew your leach drains and absorption trenches... and that can be *very* expensive.

The solution

Safe, non-toxic, and completely biodegradable, Ecocare Activator is a scientifically developed blend of natural ingredients, grease dispersants and biological stimulants that kills odours on contact, cuts through grime, breaks down grease and fat, and helps restore and maintain a healthy bacterial balance in your septic system.

Quick, safe and simple to use, the fastest way to solve septic problems with Ecocare Activator is simply to pour the recommended dosage into the sink, down the toilet, or into your washbasin, bath or shower.

Ecocare Activator goes to work at once. As it moves through the pipes it softens and breaks down built-up residues, transforming grease and fat into small globules that can be easily

BAD ODOURS
ON CONTACT**

**ELIMINATES
AND
PREVENTS
BLOCKAGES**

digested by naturally occurring bacteria.

The unique blend of trace elements and bacterial stimulants in Ecocare Activator then goes to work to ensure that nature's own 'good' bacteria have everything they need to thrive.

Blockages are removed, the breakdown of waste material is accelerated, bad smells and odours disappear, and proper drainage is restored in leach drains and the surrounding soil.

Total treatment

Ecocare Activator offers users much more than just a quick fix for smelly septics though. The same characteristics that help Activator unclog drains and fix septic problems also make it an extremely effective cleaner.

Perfect for hard surfaces such as tiles, laminex and porcelain, it's ideal for use in the bathroom and toilet ... and because it's totally non-toxic it's safe to use in the kitchen and around young children.

Ecocare Activator outperforms harsh chemical cleaners and, just as importantly, it stops you 'poisoning' your septic system and keeps it healthy for years to come. Every time you use it to make your home fresh and clean you're giving your septic system and drains three-step 'Total Treatment' protection. It's simple:

Step One: Clean your home with Ecocare Activator - use it in the kitchen, laundry and bathroom to wash down your shower, bath, basins, tiles and toilet ... you can even use it on the floor.

Step Two: Clear your drains and pipes - rinse down and pour remaining Activator into the drain when you finish cleaning ... it's no waste because Activator will make sure your pipes flow free and stay fresh smelling.

Step Three: Condition your septic - having cleaned your home and cleared your pipes Ecocare Activator flows into your septic system where its special blend of ingredients revitalise your septic system and maintain it in peak condition.

Try it, and you'll find that Ecocare Activator really works. And when you add up what you save in plumbers' bills and conventional cleaners you'll discover that Ecocare Activator is real value too!

ECOCARE

Ecocare Activator is an effective, economical multi-purpose product with many uses around the home. Supplied as a handy liquid concentrate you simply dilute it to suit your application.

Septic systems: To remove septic system odours and blockages flush 4 litres of Ecocare Activator down toilet. Continue to add 1/2 cup (approx. 125mL) of Ecocare Activator per person to system weekly.

Absorption trenches: To remove trench blockages and odours flush 4 litres of Ecocare Activator down toilet immediately and follow-up by adding 3 cups (approx. 750mL) to system per week. A minimum of 15 litres of Ecocare Activator will need to be added over a 3-4 month period to unblock trenches.

Grease traps: To maintain trap in good condition, and reduce build-up and odour, add 2 cups (approx. 500mL) of Ecocare Activator per week. For best results clean trap and line before applying Ecocare Activator and add small amounts at night (or during period of least usage).

AWTS/Greywater irrigation: To eliminate odours and blockages add an initial dose of 4 litres of Ecocare Activator followed by 2 cups (approx. 500mL) per week. For best results add small amounts each night.

**CLEANS TILES,
CARPETS,
ANYTHING!**

Cleaning: Dilute 1 part Ecocare Activator with 5 parts water for household cleaning. Spray on, leave for a few minutes, then wipe off. Suitable for use on showers, floors, toilets, sinks, tiles, baths and all hard surfaces.

Odour control: Dilute 1 part Ecocare Activator with 10 parts water and spray to destroy odours in rubbish bins, toilets, kennels etc. To remove odours from carpets apply liberally, leave 5-10 minutes, rub, then dab dry.

Drains: To remove blockages and kill odours mix 1 cup (approx. 250mL) of Ecocare Activator with 1 cup of water and add to affected drain daily until blockage is cleared and odour eliminated.

For best results: Add at night (or during period of least usage), avoid harsh chemical cleaners and caustic agents, and maintain drain and septic system condition by using 'Total Treatment' Ecocare Activator as a cleaner.

There's no better advertisement than a satisfied customer, and there's no shortage of people who have proved that Ecocare Activator really does work. In fact we're so confident that we offer a 100% money back guarantee – use Activator as directed and if it doesn't solve your septic problems simply call us within 90 days of purchase and we'll gladly refund your money.

Here's what C. Schaffner of WA had to say: "I put Ecocare Activator to the test when I noticed foul-smelling water bubbling up from the trench from my septic tank. I used Activator to do my household cleaning and poured the rest into the

ECOCARE ACTIVATOR REALLY WORKS!

toilet and drains. I was delighted to find that, after only a short period of time, I saw significant improvements. The horrible smelly liquid had stopped bubbling up, the drains were fresh and free flowing, and the house was sparkling."

Inge Vernon of NSW writes: "At the beginning of last year we noticed our rubble drain was not working efficiently. Seepage was appearing on the surface of the ground. A plumber quoted us something in the vicinity of \$1500 for a new rubble drain. Then came Activator ... after a few months the rubble drain settled down, the grease traps did not require the regular 4 to 6 weekly cleanout, and no smells from the septic tank at all. It is an excellent cleaner for bathroom and kitchen, and a quarry tiled floor in the kitchen has never looked so good."

Dolores from QLD agrees: "When I first ordered Ecocare Activator our septic tank wasn't working properly. Two plumbers had suggested we needed a new soaker trench and tank. While waiting and waiting for these busy plumbers to come and put in the new trench and septic tank I decided to order your product. Well, Activator has solved our problem and the plumber has finally turned up. He said we didn't need a new trench or tank at all, and he left with the Activator brochure in his hand.

"All I can say is thank you, and congratulations on a terrific product!"
